

GENESIS OFFICE SYSTEMS

NETWORKING EQUIPMENT SUPPLIERS

Company Profile

A Zimbabwean/Zambian And South African registered company, was formed in 1994 as a supplier of networking systems, components and accessories, for both the LAN and WAN environments, in order to meet the growing requirements for these products in the Southern Africa region. To date, we have established offices in Zimbabwe and Zambia and have incorporated companies in Botswana and South Africa; tangible inroads have been made in supplies to Malawi through established resellers.

Genesis Office Systems has been instrumental in developing, and improving, the overall network installation capabilities of the majority of the leading networking installation companies and IT system integrators in the region. This has been facilitated through our attention to providing quality products, ongoing technical and practical training for both the end-user and the installer, PLUS a quality product delivery service to meet the varied end-user supply demands in this dynamic field.

Attention is paid to keeping the installer and end-user market up to date on emerging and evolving standards, to ensure all products supplied by Genesis will provide reliable, effective and long term solutions to meet the demands of the information revolution and to keep pace with worldwide progress in our chosen field.

Genesis anticipates further regional expansion in the short term to include supplies to Mocambique, DRC and Angola, all with the express desire to develop, and improve, the networking installation practices throughout Southern Africa to ensure Africa is well placed to keep abreast of the technological requirements of the 21st Century.

MOLEX PREMISE NETWORKS

We are the appointed distributors for the Molex Premise Networks range of connectors, patch panels and cabling components for both copper and fibre optic installations. Molex is among the leading cabling system suppliers worldwide. We have introduced the product successfully in Zimbabwe, Zambia and Malawi through establishing a Certified Installer (C.I) Program. This means that approved installation companies are trained in all concepts pertaining to Category 5E and Cat 6/7 cabling standards, in order for them to install systems to be covered by the 20 Year System Warranty attributable to Molex installations. This is issued in conjunction with the Lifetime Product Warranty.

FIBRE OPTIC SYSTEMS – FOS/ATC

F.O.S. is the marketing division of A.T.C., the South African manufacturers of fibre optic cable. FOS/ATC have recently come to an agreement with Molex Premise Networks whereby the 20 Year System Warranty will be attributed to any system incorporating ATC cable and Molex components. They also sell complete range of F.O. connectors and other fibre accessories as well as promoting the Transition range of media converters and transceivers. Genesis, in conjunction with ATC, are also able to offer turnkey fibre installation services with a focus on providing OPGW cable for incorporating data transmission services over power transmission lines - this includes civils, installation and termination services. ATC are the leading provider of this service throughout Southern Africa.

Directors: D.S Brannigan (CEO), L Brannigan, E.Mwecha, B Frederiksen, E Connolly.

ALVARION [BREEZECOM]

We are the appointed distributors of this world leading range of Broadband Wireless Access (BWA) communication equipment.

BreezeCOM now Alvarion radio units will satisfy any markets from the small SOHO to large organizations including universities, hospitals etc and have a particular focus on supplies to the ISP market with their BreezeAccess range of equipment operating in either the 2.4GHz ISM bandwidth or in the licensed 3.4-3.5GHz frequency range. We are also proud to be associated with the only company at present which complies with all the WIMAX Regulations. BreezeCOM joined forces with Floware and have rebranded their products under the name Alvarion to offer a much more comprehensive range of frequencies to suit any local legislative requirements insofar as frequency allocations are concerned.

AFRAC

Supply a complete range of data storage cabinets and enclosures. From wall mount cabinets, through to the largest floor standing units/racks. We also manufacture a range of wall mount cabinets in Zimbabwe.

LAMBDA TEST EQUIPMENT

Suppliers of fibre optic test and measurement products including EXFO and Sunrise (GSM Monitoring). These products are widely used in the GSM cellular industry to test network performance and for fault finding.

PVC GROUP including the M.K. Range of products For sales of PVC trunking and other containment systems, which are used in the I.T. and electrical industries. The latest product, exclusive to the PVC Group, is the ultra modern Phoenix Trunking. Phoenix trunking is superbly suited for surface protection of power cables, running of computer network cables, protection and placement of telecommunication wiring for a neater slim line installation.

TRENDnet U.S.A.
